

ATOM Medical is Dedicated to:

- **Innovative solutions** to enhance the care of newborns
- **Trusted partnership** – count on us to be there when you need us
- **Developing products** that save tiny babies' lives

Since 1938, ATOM Medical has been developing innovative products to meet the special demands of the maternal/infant care environment. Our mission – “to save a tiny baby's life,” has been our corporate mission since the very beginning.

A Commitment to Excellence.

ATOM is the **only** company solely dedicated to the neonatal market. Our products are designed to give clinicians – as well as families – the ability to care for these tiny newborns safely and easily.

ATOM's sole focus is on delivering easy-to-use solutions to the challenges neonatal caregivers face every day. That's why 100% of every R&D dollar is spent on developing new product solutions for our customers. With ATOM you create a partnership dedicated to building best-in-class mother/infant settings and NICUs.

ATOM is committed to our U.S. market; and as the number of hospitals that rely on our products continues to grow, so too does our level of support. Let us show you how ATOM products can work for you, today and in the future.

Product Portfolio

Infa Warmer i Model 103

for LDR, Newborn Nursery

- Intuitive touch screen user interface

- Uniformity of heat across the entire mattress

- Resuscitation module for NRP guidelines

- Quiet glide side panels

Infa Warmer i Model 103

for Levels II, III, IV, PICU, CVICU and ECMO Centers

- Largest bed surface area

- In-bed scale with graphic or tabular trending

- Power pack: Unplug and go

- Drainage hangers and grommets baby guard to organize lines and tubing

- Swivel heater head rotates and tilts

- Access for x-ray on three sides

Sunflower Warmer - Freestanding and Wall Mount

Simple and versatile, the Sunflower radiant warmer's space-saving design can be configured for use in any department.

- Dual rail configuration gives access to the patient from all 4 sides and allows maximum flexibility in configuring accessories

ATOM Model 100

Infant Combi: Quietly Superb

- Standard double lock access panel for added safety

ATOM Model 100

Innovative design features supporting developmental care

- Simply serene, offering an internal environment less than 41 dBA to support developmental care goals
- Lovingly low providing a range of vertical positioning to support family-centered care
- Silent glide access panels and gentle quiet port doors minimize the stress-inducing noise frequently produced when accessing the patient
- No disturb external x-ray cassette tray access door is separate from the side access panels so the environment is not disturbed during radiologic procedures

Intuitive and convenient controller

- The user friendly touch screen display can be easily positioned, right, left or centrally on the unit
- Color-coded measurements and set points for temperatures, relative humidity, oxygen concentration, pulse oximetry and patient weight are easy to identify and intuitive to operate

A few of the many options available:

- Pulse oximetry – easily added at time of sale or post sale
- Battery back-up power supply enabling transport with uninterrupted heating and monitoring
- Connectivity (data transfer) to physiologic monitors and EMR (Electronic medical records)

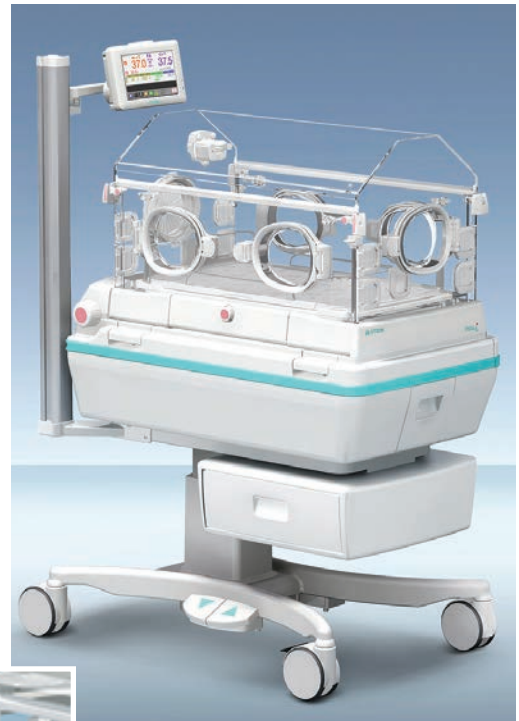

Incu i ATOM Model 101

Innovative design features supporting developmental care

- Simply serene, offering an internal environment less than 41 dBA to support developmental care goals
- Lovingly low providing a range of vertical positioning to support family-centered care
- Silent glide access panels and gentle quiet port doors minimize the stress-inducing noise frequently produced when accessing the patient
- No disturb external x-ray cassette tray access door is separate from the side access panels so the environment is not disturbed during radiologic procedures

Intuitive and convenient controller

- The user-friendly touch screen control panel is mounted on the periphery to allow easy operation without disturbing the patient
- Color-coded measurements and set points for temperatures, relative humidity, pulse oximetry and patient weight are easy to identify and intuitive to operate

- Standard double lock access panel for added safety

■ **ATOM Transport: Confidence in Motion**

Transcapsule® V-808

Maintain a stable nursing environment in a variety of transport situations

Smooth travel on catamaran castors, padded handles for staff comfort, and an ergonomic design height make the V-808 well suited for your in-house transport needs.

- Head-end admittance panel and rear snap-open access ports
- Main unit separates from cabinet base for increased mobility
- Double-wall hood for stable thermal environment
- Built-in pulse oximeter, temperature, and oxygen monitors

Neo Cot Infant Bassinet

A host of innovative design features

This infant bassinet is easily configurable for multiple care areas

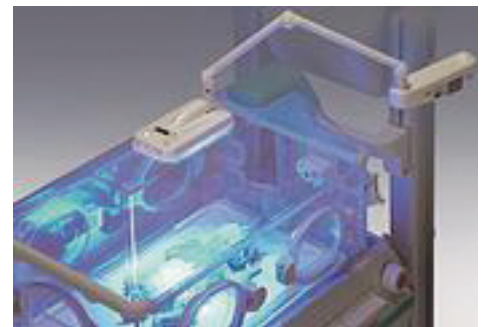

- Telescoping pedestal raises bassinet from bedside to staffside (24.5 in. to 32.5 in.)
- Large clear tilting bassinet provides full view of infant, easy to clean surface and smoothly tilts from 0-12°
- 4-wheel locking casters enhance stability of the cot during mother and staff access to infant
- Streamlined design and small footprint maximizes precious workspace

Phototherapy and Lighting

ATOM Bili-Therapy products deliver effective phototherapy for the treatment of indirect hyperbilirubinemia

- The effective wavelength from the blue LED light source, coupled with output of up to 53uW/cm²/nm, provides the optimum for photo-decomposition of bilirubin
- Bili-Therapy Pad (three irradiance level settings) and Bili-Therapy Spot may be used in combination to provide double phototherapy treatment

Skin Temperature Probes

Disposable (20/box)

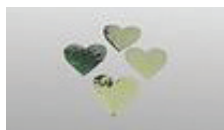

NF-023

Single Reusable (Yellow)

NF-024

Single Reusable (White)

60880

Gentle Release Covers (80/box)
